## Key Features

- Independent wheels
- Track position sensors
- Onboard steering actuation
- Guidance control for minimal wear
- Optimisation of vehicle running life
- Patent protected & applications

LOWER OPERATIONAL COSTS ↓ ↑ HIGHER QUALITY OF URBAN LIFE

**DR. TOM MORRIS**  
CEO

„Traila is determined to solve a known problem within rail, at the very root - the 'wear and tear' at the Wheel-Rail interface.

The combination of our creativity with a deeply ingrained agile engineering mindset is exciting and unique, and now being recognized by industry leaders.“

**DANIEL STALDER**  
OPERATIONS

„We collaborate and cooperate with leading operators and suppliers within the rail sector, in order for all of us to achieve our goals.

This is a shared vision, and we are totally motivated by the intellectual challenge.“
